Asia Pacific Forum 2022

1-2 December
2022

Australia-Japan Research Centre

The Australia-Japan Research Centre (AJRC) is the centre of research, teaching and outreach on the Japanese economy in Australia. AJRC also conducts research to better understand the Australia-Japan relationship and both countries' strategic interests in the regional economy. AJRC was established in 1980 with support from the governments and business communities in both Australian and Japan, with its research encompassing areas such as finance and macroeconomics.

Japan Economic Foundation

The Japan Economic Foundation (JEF) was established in July 1981 to deepen mutual understanding between Japan and other countries through activities aimed at promoting economic and technological exchanges.

With this goal in mind, JEF engages in a broad range of activities; it provides information about Japan and arranges opportunities to exchange ideas among opinion leaders from many countries in such fields as industry, government administration, academia and politics in order to break down the barriers to mutual understanding.
